📍 Aarhus, Denmark

Software engineer working on web applications, infrastructure, and DevOps at Region Midtjylland. I maintain Kubernetes clusters and build microservices for healthcare systems, focusing on security and compliance requirements.

I work primarily with Go, Rust, TypeScript, Kotlin, and Java. My day-to-day involves Kubernetes, CI/CD pipelines, and API development. I enjoy improving developer workflows and contributing to open source projects.

Experience & Education

 DevOps Engineer @ Region Midtjylland September 2024 – Present

Maintain production Kubernetes clusters for healthcare microservices. Build automation tools in Go, Rust & TypeScript. Handle on-call incident response and develop GDPR-compliant APIs for clinical systems.

 Software Developer @ Region Midtjylland May 2023 – September 2024

Built web applications for clinicians using TypeScript and Java Spring Boot. Implemented security features for healthcare compliance and developed RESTful APIs for clinical workflows.

 Web Developer Program @ Viden Djurs August 2020 – November 2022

Full-stack web development education covering programming fundamentals, API design, and modern web technologies.

Open Source Projects

Contributor to 6+ open source projects, mostly developer tools and TypeScript libraries.

vitest-testdirs

github.com/luxass/vitest-testdirs

A utility for Vitest to create isolated test directories

unplugin-yaml

github.com/luxass/unplugin-yaml

Allow import YAML file for Vite, Webpack, Rollup and esbuild. With TypeScript support. Powered by unplugin.

github-schema

github.com/luxass/github-schema

Typed GitHub GraphQL schema library for developers

actions-kit

github.com/luxass/actions-kit

A GitHub Actions toolkit for TypeScript

ucdjs

github.com/ucdjs/ucd

A JavaScript library for Unicode character data
