Lucas Nørgård

DevOps Engineer specializing in **Kubernetes** infrastructure, **healthcare compliance**, and **TypeScript** developer tooling. Experienced in **Go**, **Rust**, **Java**, **Spring Boot**, and **CI/CD** automation. Designed CI/CD pipelines for healthcare applications while managing production clusters and supporting "You Build It, You Run It" culture with focus on **developer experience** and system **resilience**.

Experience & Education

 DevOps Engineer @ Region Midtjylland Sep 2024 – Present

Designed and implemented **CI/CD pipelines** for healthcare applications while managing **Kubernetes clusters** and service infrastructure at scale. Supported "You Build It, You Run It" culture by taking backend responsibility for applications and platform services. Focused on improving **developer experience** and **CI/CD efficiency** to ensure system **resilience** across healthcare infrastructure.

 Software Developer @ Region Midtjylland (DIAS) May 2023 – Sep 2024

Engineered healthcare applications and integrations using **Go**, **TypeScript**, **Java**, **Kotlin**, and **Spring Boot** within the DIAS development unit. Developed **message handling systems** processing **200–300K weekly transactions** between X-ray and booking systems, built **patient safety solutions**, and created applications for managing **SOR codes** (healthcare organization registry). Implemented **consent portals** integrated with glucose monitoring projects and optimized **CI performance** for cross-functional teams.

 Web Developer Vocational Education @ Viden Djurs Aug 2020 – Nov 2022

Completed comprehensive full-stack web development program covering programming fundamentals, API design, and modern web technologies. Gained foundational expertise in **TypeScript**, **React**, and web application architecture.

Open Source Projects

Authored **TypeScript developer tools** focused on **build optimization** and **developer experience**, with adoption by development teams worldwide. Active contributor to open source projects that improve development workflows and tooling ecosystems.

@hono/zod-openapi

github.com/honojs/middleware

Fixed critical OpenAPI generation bugs affecting basePath and pathPrefix handling, improving API documentation accuracy for thousands of developers.

@vitest/eslint-plugin

github.com/vitest-dev/eslint-plugin-vitest

Enhanced ESLint plugin with automatic fixes for common Vitest patterns and improved rule detection, streamlining test code quality for the ecosystem.

unplugin-yaml

github.com/luxass/unplugin-yaml

Universal YAML import plugin for modern bundlers. Seamlessly import YAML files as JavaScript objects with full TypeScript support across Vite, Webpack, Rollup, and esbuild.

vitest-testdirs

github.com/luxass/vitest-testdirs

Clean, isolated test directories for Vitest. Automatically creates and manages temporary directories for each test, ensuring no test pollution and reliable file system testing.
